The image shows a screenshot of a photo editing application. On the left, a large photo of a young child in a patterned dress is shown against a solid blue background. Above the photo is a toolbar with a close button (x), zoom in (-), zoom out (+), and a 97% zoom level indicator. Below the photo is a blue 'Download' button. On the right, a vertical panel contains editing options. At the top, there are 'BACKGROUND' and 'ERASE / RESTORE' tabs. Below these is a small thumbnail of the photo. Two tabs, 'Photo' and 'Color', are visible, with 'Color' being the active tab. A green arrow points from the right towards the 'Color' tab. Under the 'Color' tab, there is a 'Color' section with a color palette and a grid of 12 color swatches, each showing the child's photo with a different background color. The colors in the grid include red, yellow, green, cyan, blue, purple, magenta, and pink.
