

BeepBox

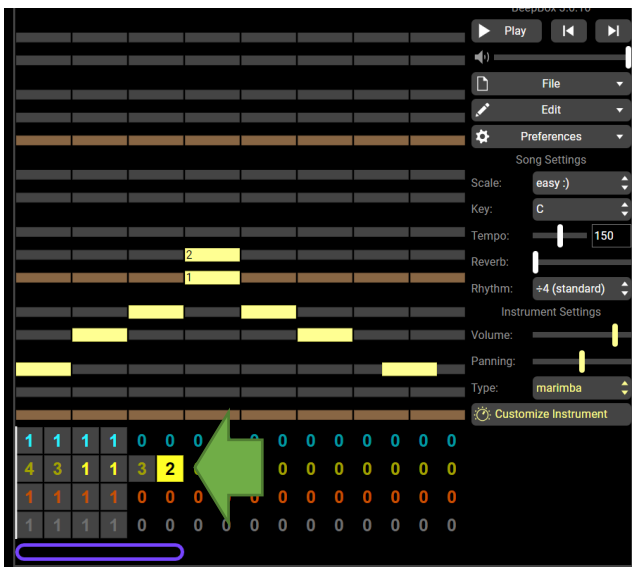

Klik op de hokjes, ze lichten dan op, om een geluid te krijgen.

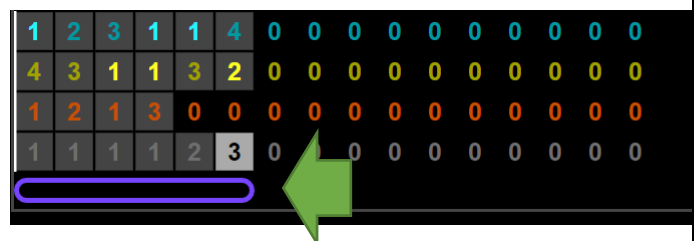

Onderaan zie je 4 gekleurde lijnen. Elk heeft een eigen geluid.

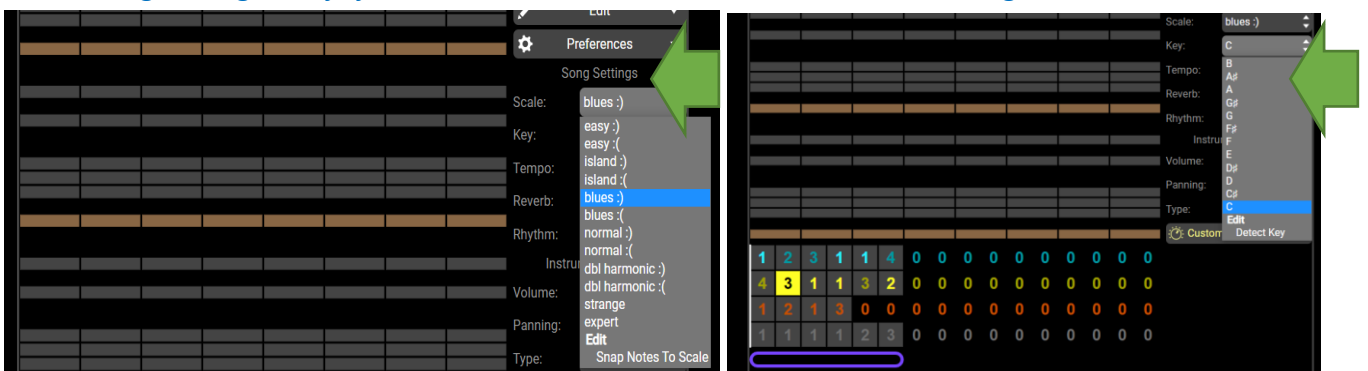

Met elk kun je een aantal verschillende patronen maken. Klik je op nr 1 en maak daarna 2, 3 of meer.

Met de paarse balk geef je aan hoelang je fragment moet duren.

Onder song settings kun je je lied een ander instrument of ritme en snelheid geven.

Klik op: File en export song om je product op te slaan.

The screenshot shows the main interface of the software. On the right side, the 'File' menu is open, and the 'Export Song...' option is highlighted with a green arrow. Other options in the menu include '+ New Blank Song', 'Import Song...', 'Copy Song URL', 'View in Song Player', 'Copy HTML Embed Code', and 'Recover Recent Song...'. Below the menu, there are several sliders and dropdowns for settings: Tempo (163), Reverb, Rhythm (÷4 (standard)), Instrument Settings (Volume, Panning), and Type (marimba). At the bottom, there is a keyboard layout with numbers 1-4 and 0, and a 'Customize Instrument' button.

Vul een titel in. Kies voor het type opslag, meestal mp3 en klik export.

The screenshot shows the 'Export Options' dialog box. The 'File name' field contains 'BeepBox-Song'. The 'Intro' checkbox is unchecked, 'Loop Count' is set to 1, and 'Outro' checkbox is checked. The 'Export to .mp3 file.' option is selected in the dropdown menu. The 'Export' button is visible at the bottom. A second 'Export Options' dialog box is shown to the right, with the 'Export to .mp3 file.' option highlighted in blue and a green arrow pointing to it.
